

Google Docs for English

Welcome back everyone!

In an effort to 'streamline' everything and keep everything neat and tidy, everyone is going to create a google folder which will store all of your coursework. But, why, do you ask? With your various assignments, as well as your essays, it will be much easier to keep all your work together. You should already have a gmail account from your Spanish class, so this will be easy - if you don't have a gmail account, please make one!

What to do:

- ★ Make a folder in your google drive.
The title should be your first and last name - class name
Example: Huck Finn - Intro to Lit
 Huck Finn - American Lit
Make sure when you share it with me that you give me editing (click can comment) privileges. My email is carolyndyrviknca@gmail.com

- ★ Please create a google doc in your google folder and complete for 8-26:
 - Please name your document: First Name, Last Name, Intro
 - Your document should include the following:
 - Your full name (& nickname that you go by if you have one) & anything about you that you want me to know about you - it is all confidential.
 - Name one interesting thing you did this summer
 - What are you looking forward to the most in this course?
 - What are you most anxious about this course?
 - What do you hope to accomplish/gain?
 - This is NOT a formal essay, however, spelling and grammar do count :)

And, this is important:

- ★ All your documents must be 'created' in google docs, or your formatting will be a nightmare when you try to save your Word document to google docs. **The only exception is your summer essay.** If you have already written your essay I do not expect you to retype it. However, please do add it to your google folder when you submit it.
